Fire Pit Hook Up Information

1. To gain access to the key valve, the Fire Pit will need to be lifted and accessed through the bottom.
2. You will need 2 flex lines (3/8"); 2-36" flex lines.
3. From your gas supply, run the 36" flex line with a 1/2" standard male fitting to the key valve.
4. From the key valve, you will need a 1/2" standard female fitting attached to the 36" flex line to connect to the burner.
5. To connect to the burner you will need a 3/8" male flared fitting.
